VISHAL KARTHIKEYAN

QA Engineer | Software Test Engineer

Chennai, India • +91 8489793616 • vishalsk797@gmail.com • LinkedIn Profile

PROFESSIONAL SUMMARY

QA Engineer with 1+ year of experience in Manual and Automation Testing across enterprise platforms. Proficient in Selenium WebDriver + TestNG (Java), Playwright (TypeScript), Page Object Model (POM), and Postman API Testing. Delivered end-to-end STLC coverage across ERP, HRMS, LMS, EdTech, and Event Management domains. Led automation migration using the Antigravity AI Framework. Experienced in Agile/Scrum delivery, SQL data validation, and Jira defect management.

TECHNICAL SKILLS

Testing: Manual, Functional, Regression, Smoke, Integration, UAT, Usability, Negative, Cross-Browser, Compatibility
Automation: Selenium WebDriver + TestNG (Java) • Page Object Model (POM) • Playwright + TypeScript
AI Migration: Antigravity AI Framework — AI-assisted Test Automation Migration & AI-powered Test Inheritance
API Testing: Postman (REST API) • Playwright API Testing — Request Validation, Response Schema, Status Code Verification
Database: SQL — Joins, Subqueries, Aggregations, Data Validation
Languages: Core Java • TypeScript
Tools & Tracking: Jira • Trello • ClickUp • Extent Reports • Eclipse IDE • VS Code • Git
Methodology: Agile (Scrum) • SDLC • STLC

WORK EXPERIENCE

Inzeph Software Ventures | QA Engineer (Software Test Engineer) — *Jan 2025 – Present*

Stack: Selenium WebDriver • TestNG • Java • Playwright • TypeScript • SQL • Postman • Git | Design Pattern: POM | Tools: Eclipse, VS Code, Jira, Trello, ClickUp, Extent Reports

Appsinfy (ERP) – 2 Platforms — *Selenium, TestNG, Playwright, POM, Jira*

- Built Selenium WebDriver + TestNG (Java) framework with POM design — cut test maintenance effort by 40%.
- Led Playwright (TypeScript) migration using Antigravity AI Framework; AI-powered test inheritance eliminated redundant scripting.
- Covered Functional, Smoke, Integration, and Regression Testing each sprint across user management, workflows, approvals, and dashboards.
- Tracked defects in Jira with severity/priority tagging; generated Extent Reports for sprint sign-off via Git-managed scripts.

MyStax – Multi-Role SaaS Marketplace Platform — *Manual Testing, RBAC, Subscription Flows*

- Tested end-to-end flows across Admin, Provider (Seller), and Buyer roles — covering org registration, product approval workflows, subscription purchase, and dashboard access.
- Validated Admin governance: org and product approve/reject/hold workflows, platform fee configuration, user management, and revenue dashboard accuracy.
- Executed Provider flow testing — payment/Stripe setup, product lifecycle (Draft → Approved → Live), invite user flows, and earnings dashboard.
- Verified Buyer flows: product browsing, cart, checkout, subscription management (cancel/re-activate), and RBAC data isolation across all roles.

PulseOps – HR Management System — *Selenium, TestNG, SQL, Jira*

- Authored 80+ test cases (positive, negative, boundary) covering onboarding, leave approvals, attendance, and HR report modules.
- Executed RBAC testing across Admin, HR Manager, and Employee roles — ensured zero unauthorized data access.
- Detected critical defects in approval workflows and data validation, driving a 30% reduction in post-release bugs.
- Maintained full traceability matrix; delivered UAT sign-off documentation each sprint.

MyInvite – Event Management Platform (Web & Mobile) — *Cross-Browser, Cross-Device, Functional Testing*

- Tested end-to-end flows: event creation, invitations, ticketing, seat booking, and analytics modules.
- Validated payment gateway scenarios — success, failure, and timeout — ensuring reliable transaction handling.
- Ran Cross-Browser Testing (Chrome, Firefox, Edge) and cross-device testing (Android & iOS) for consistent UI and responsiveness.
- Maintained defect logs with reproduction steps, screenshots, and observed vs. expected outcomes for every reported issue.

OWL (ScienceAid) – AI-Powered Science Study Guide — *Selenium, TestNG, Exploratory, Usability Testing*

- Validated AI Q&A accuracy, contextual relevance, and edge case handling across Physics, Chemistry, and Biology.
- Identified 15+ UX issues through Usability and Exploratory Testing — directly improved platform engagement metrics.
- Automated regression coverage for navigation, search, and content rendering using Selenium WebDriver + TestNG.
- Stress-tested system stability via Negative Testing with invalid inputs and unsupported query formats.

Parking App – Website & 2 Mobile Applications — *Functional, Compatibility, UAT, API Testing*

- Validated full booking lifecycle: slot selection, real-time availability, payments, QR code generation, and gate entry/exit.
- Tested GPS services, QR scanner, and third-party API responses across Admin, Event Manager, and Parking Staff roles.
- Performed Compatibility Testing on multiple Android and iOS versions — confirmed consistent UI rendering across devices.
- Produced complete UAT documentation: test case reports, bug logs, and sign-off reports for smooth production release.

Smart School – School Management System — *Functional, Smoke, Integration Testing, SQL*

- Designed multi-role test scenarios (Admin, Teacher, Student) for attendance, leave, timetable, and academic record modules.
- Validated data integrity across student records and teacher schedules using SQL backend queries.
- Executed Functional, Smoke, and Integration Testing each sprint — ensured zero critical defect leakage to production.
- Coordinated retesting cycles with developers and maintained sprint defect logs throughout the release.

LMS – Learning Management System — *Postman API, Selenium, Data-Driven Testing*

- Tested course creation, enrollment, assessments, progress tracking, and certificate generation for Instructor and Student roles.
- Performed REST API Testing via Postman — verified response codes, payload schema, and error messages for enrollment and scoring endpoints.
- Ran data-driven test scenarios and boundary condition checks across all LMS input forms.
- Achieved 100% test case execution within every sprint deadline; maintained daily defect logs and test summary reports.

EDUCATION

B.Tech – Information Technology *Jul 2020 – May 2024*

Adithya Institute of Technology, Coimbatore

CERTIFICATIONS

Qspiders Training Institute, Chennai (Jul 2024 – Mar 2025): Core Java • Manual Testing (SDLC, STLC, Agile) • Automation Testing – Selenium + TestNG • SQL (Joins, Subqueries, Aggregations)

LANGUAGES

English (Professional Proficiency) • **Tamil** (Native)
